GOOD, STRONG DIVISIONS

\$20.00 per 100

Should be planted $1\frac{1}{2}$ by 3 ft. in the row, rows 3 feet apart. This would require about 9,680 plants to an acre. These should be lifted in the Fall, after harvesting the flowers. Plants removed from the ground and heeled in a good, dry frostproof frame. Dry packing with material like saw dust or peat is best. Considerable increase in roots each season.
